

Charter Appeal : The *PURR-FECT* combination

Lightwave Yachts new 3-cabin or 4-cabin layout has taken the Australian charter market by storm, with two new 38' sailing catamarans joining their existing fleets in Queensland's Whitsundays, this year.

The newly designed interior and options provide the 3 cabin layout with accommodation for 6-8 persons with two showers and two toilets, while the 4 cabin layout provides accommodation for 8-10 persons with two showers and two toilets.

Lightwave Yachts signature steering position is located port side and allows the skipper to maintain contact with family and guests in the saloon, cockpit and galley areas at all times. The 'Raised Helm Position' is distinct in its practicalities and styling, sporting a hard top and the benefit of being able to be fully enclosed to give protection from all elements. "The Raised Helm design is great for the charter market as the Skipper can view both bows and sterns from the steering position without leaving the steering wheel or engine controls. This means that the Skipper maintains safe control at all times." comments Roger Overell, Managing Director of Lightwave Yachts.

Don't miss the Lightwave Yachts on water display at this years Sanctuary Cove, Airlie Beach and Sydney International Boat Shows. Check the Lightwave website for dates.
