

FLASH DANCER

Robin and Susan of Geelong, Victoria are the proud owners of the first Lightwave 46' Power Cat. 'Flash Dancer', who will reside on the Gold Coast, will spend her days cruising extensively throughout the beautiful anchorages found along the Queensland coastline.

The main intention behind their new purchase was to create an environment where they could enjoy good quality family time together, and for Robin, the occasional fishing expedition. 'The bait tank is brilliant. It provides plenty of space for bait and to throw in those freshly caught estuary fish. These factors enhance what a great fishing boat the Lightwave 46' Power Cat is!', comments Robin.

When asked what were the deciding factors they considered in the purchase of their Lightwave, Robin replied, 'The Lightwave Power Cats have some extremely well designed concepts catering specifically for safety, economy, and ease of use. It's use of innovative engineering, smart design, and quality components will become more important over the years as we cruise and use our boat. This makes Lightwave Cats about as reliable and easy to service as you are likely to get in the marketplace today'.

So there you have it. Whatever your idea of relaxation is, the Lightwave 46' Power Cat will provide you with the ultimate cruising experience.
